MEMORANDUM FOR: Chief, Information Processing Division

THROUGH : Deputy Chief, Information Processing Division

SUBJECT :  Plotter

1. Attached is a memo written by  the project monitor for the marking system contract on the  Plotter. The recommendations made in the memo appear to satisfy your requirements for reproducibility. These recommendations result largely from the developmental efforts of the project monitor and not the contractor.

2. The efforts of the contractor have been somewhat marginal. However, since the contract specified a study and the contractual requirements have been fulfilled, the only penalty that can be imposed is one of omission of the contractor from future consideration.

3. It is suggested that you use the marking system recommended in the attached memo.  will continue to make a concerted effort to achieve a plotter performance that satisfies your needs.

Colonel, USAF

Assistant for Technical Development, NPIC
